

Rocky Mountain Spotted Fever

Diné Bizaad (Navajo) translation — pending tribal-IRB-vetted translator

TRANSLATION PENDING — DO NOT DISTRIBUTE.

This handout template requires review and translation by a Diné Bizaad (Navajo)-fluent medical translator working under the relevant tribal IRB before it is provided to a patient.

The English-language source content for this handout exists in this repository (handouts/rmsf_en.pdf) and may be used as the source text for a translator commissioned through:

- Navajo Nation Department of Health, Office of Communications & Health Education
- Diné College Center for Diné Studies — medical translation services
- Navajo Area IHS Office of Public Health Support

Why this matters. Distributing machine-generated medical content in Indigenous languages without fluent medical-translator review carries a real risk of clinical harm and a real risk of cultural disrespect. The architecture supports the language; the process for filling the slot is itself the work.
